Portfolio

EDUCATION

Presidency University Bengaluru, India
Bachelor of Technology in Information Science & Engineering (AI & Robotics); CGPA: 8.90 / 10 2024 - 2028
Coursework: DSA, OOP, DBMS, Operating Systems, Computer Networks, Artificial Intelligence, Web Technologies

EXPERIENCE

Full-Stack Web Development Intern Jul 2026 - Sep 2026
Technofenatics Solutions LLP (Sattix) Bengaluru, India

- Shipped features to Shorthand Pro, a live production web application (PHP, SQLite, JavaScript), in a ticket-based Agile team with daily stand-ups and code reviews.
- Made community links admin-configurable through the existing key-value settings store, so future changes need no code deployment and no database migration.
- Debugged role-based dashboard UI defects with Chrome DevTools; fixed a stale-asset caching bug with filemtime() cache busting, adopted as the team's pattern for CSS releases.

Web Development Intern Jan 2026 - Feb 2026
Amdox Technologies Remote

- Built JobConnect, a Node.js + Express job portal with REST APIs, JWT + bcrypt auth and role-based access control.
- Implemented multi-filter job search and a 5-stage hiring pipeline (Applied to Hired / Rejected) for both roles.

PROJECTS

CivicLens | *Python, FastAPI, PostgreSQL, Redis, LLM, RAG, Docker, CI/CD* github.com/thirthpatel2-web/Civiclens

- Primary developer (authored all 93 commits) of a consent-based data-sharing gateway for government departments: designed the architecture and built 187 REST API endpoints, identity resolution, an audit ledger and request tracing.
- Built a RAG legal-search module using pgvector semantic search over 38,238 Supreme Court records that only returns answers it can cite; added voice input in 10 Indian languages (Whisper).
- Wrote 768 automated tests (unit, integration, end-to-end) run in GitHub Actions CI; cut API latency ~10x (to 13 ms/request) by caching the anti-user-enumeration Argon2 timing hash, which cost ~75 ms of CPU per request.

Cascade Failure Env | *Python, LLM Agents, RL, Docker* huggingface.co/spaces/ThirthPatel/cascade-failure-env

- Designed a reinforcement-learning environment where LLM agents act as on-call engineers in a 12-service microservice graph, with deterministic graders, shaped rewards and 3 difficulty levels.
- Built for the Meta x Hugging Face OpenEnv Hackathon; containerised with Docker and deployed on Hugging Face Spaces.

IRIS - Disaster Intelligence System | *Python, FastAPI, WebSockets, Leaflet, LLM* github.com/thirthpatel2-web/disaster-intel

- Built real-time multi-hazard risk scoring for 5 hazards across 14 Indian cities with 72-hour early warnings, 13 REST endpoints, a WebSocket alert stream and an LLM analyst (FusionX Hackathon 2026).

RoadScan AI | *Python, OpenCV, TensorFlow / Keras, Flask* github.com/thirthpatel2-web/Road_scan_AI-

- Built pothole detection and road-condition grading from a single image in ~1 s using OpenCV contour analysis, with automatic switch-over to a Keras CNN model when trained weights are available.

Signal - AI Resume Analyzer | *Python, scikit-learn, NLP, Flask* github.com/thirthpatel2-web/AI-Resume_Analyser

- Built resume-to-job matching across 25 roles using TF-IDF and cosine similarity, with skill-gap analysis explaining each score.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL, PHP, HTML/CSS
ML & GenAI Tools: scikit-learn, TensorFlow/Keras, OpenCV, LLMs, RAG, Vector DB (pgvector), AI Agents, NLP, Computer Vision
Web Frameworks: FastAPI, Flask, Node.js, Express.js, React, REST APIs, WebSockets
Databases & DevOps: PostgreSQL, MySQL, MongoDB, Redis, SQLite, Git, GitHub Actions (CI/CD), Docker, Linux, pytest
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

ACHIEVEMENTS

- 3rd Place, InnovateX 4.0 AppForge (international tech fest) with CivicLens; Top 5 with EthicaMind.
- Hackathons 2026: Smart India Hackathon, Meta x Hugging Face OpenEnv, FusionX and Hack Devengers 2.0.
